

FlexTraining – Premium Hosting Services

For our customers, “hosting” means much more than utilizing a disk drive. We bundle a full set of professional services into our hosting package:

Hardware-related tasks: System installation, system configuration, security, data backups, hardware monitoring and replacement.

Software-related tasks: Upgrading software, upgrading database platforms, installing updates and fixes, performance monitoring.

At FlexTraining, we want ALL of our customers to create and deliver their online courses “in the cloud”. And our premium hosting service is how we make it happen.

Take full advantage of professional hosting

Eliminate your infrastructure and personnel costs. Your training system is housed in a state of the art facility:

-  Massively redundant power supplies
-  Intelligent multi-carrier high-speed routing
-  Secure access and 24-hour management
-  Serviced by FlexTraining system developers

You can move your FlexTraining system in a day or two, with no loss of data – courses, students, or progress. Just drop us a note to schedule your move to the next level!

Full-service premium hosting

-  Save time and money
-  Enhanced reliability
-  Enhanced performance
-  Professional management
-  Scalable infrastructure

The Future Is In The Cloud!
